

裝 plugin

1.

去

https://github.com/derek0717/mirror_helper

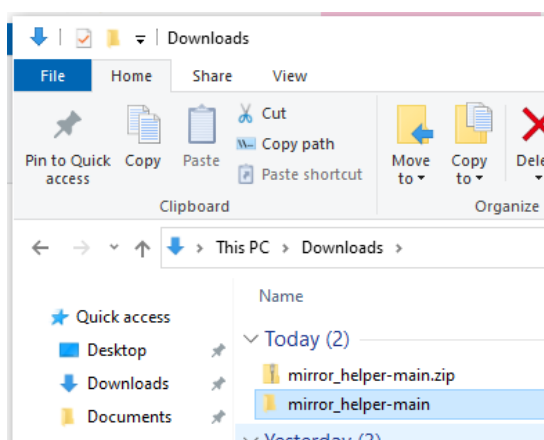

2.

下載

綠色掣->Download ZIP

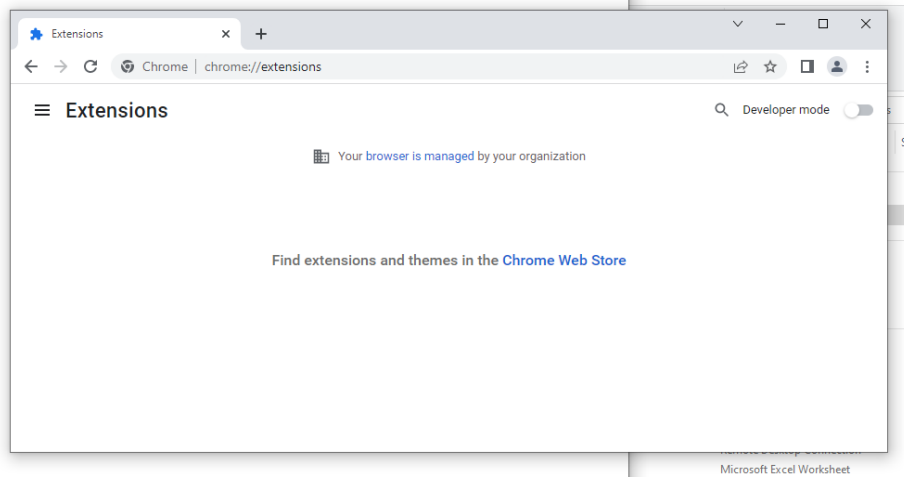

3. 解壓

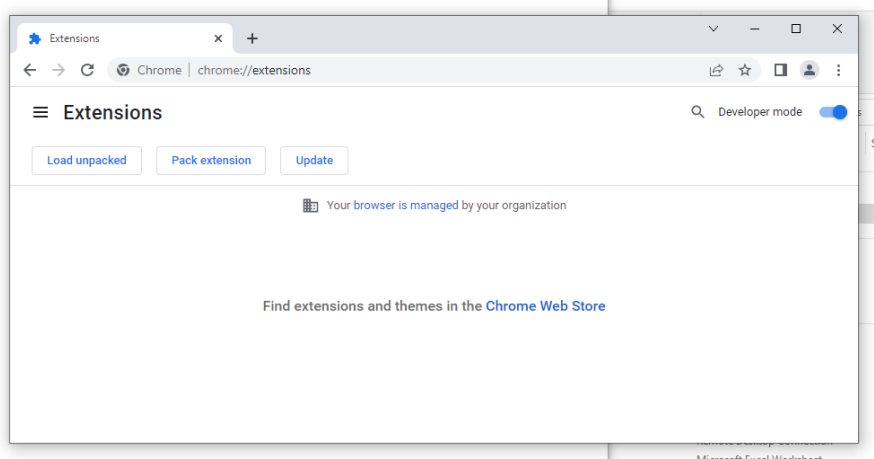

4.

喺 chrome 去呢頁

chrome://extensions/

5.開右上 Developer mode

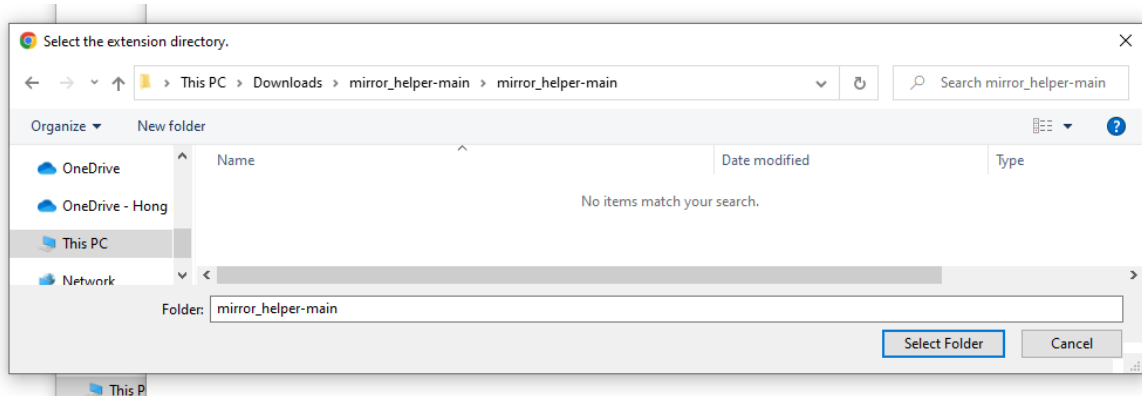

6.揀 Load unpacked

7. 搵解壓左既 folder, 襟 Select folder

* 視乎你點解壓, 可能要入多層, 好似我咁:

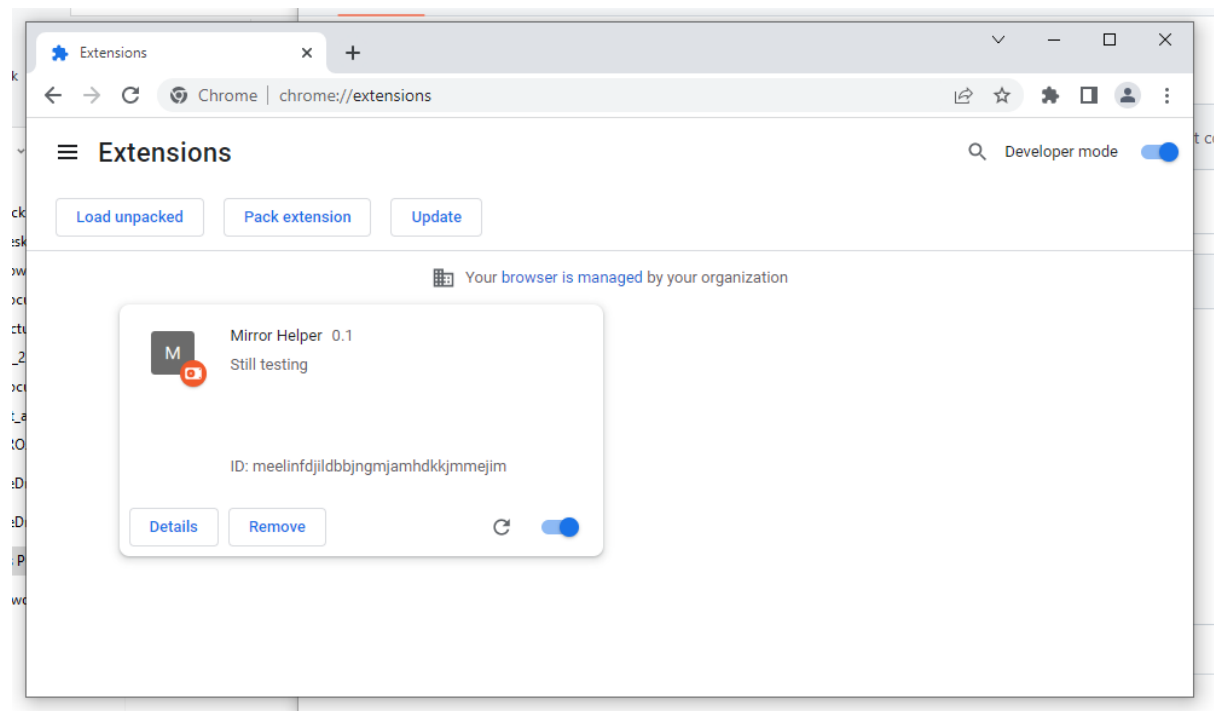

Mirror_helper-main > mirror_helper-main

總之要見到 No items match your search, 冇得再入喇

8. 應該會見到咁

如果彈 error, 睇返上一個 step 有冇揀錯 folder 層數

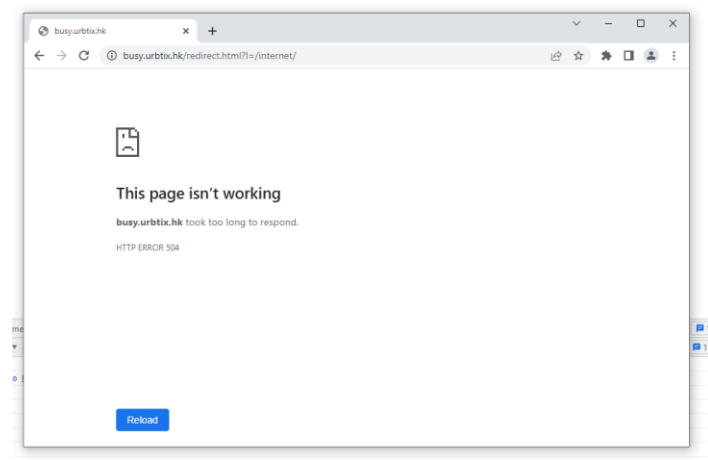

9.

去下 <https://ticket.urbtix.hk/internet/>

可以開始自動 refresh 喇

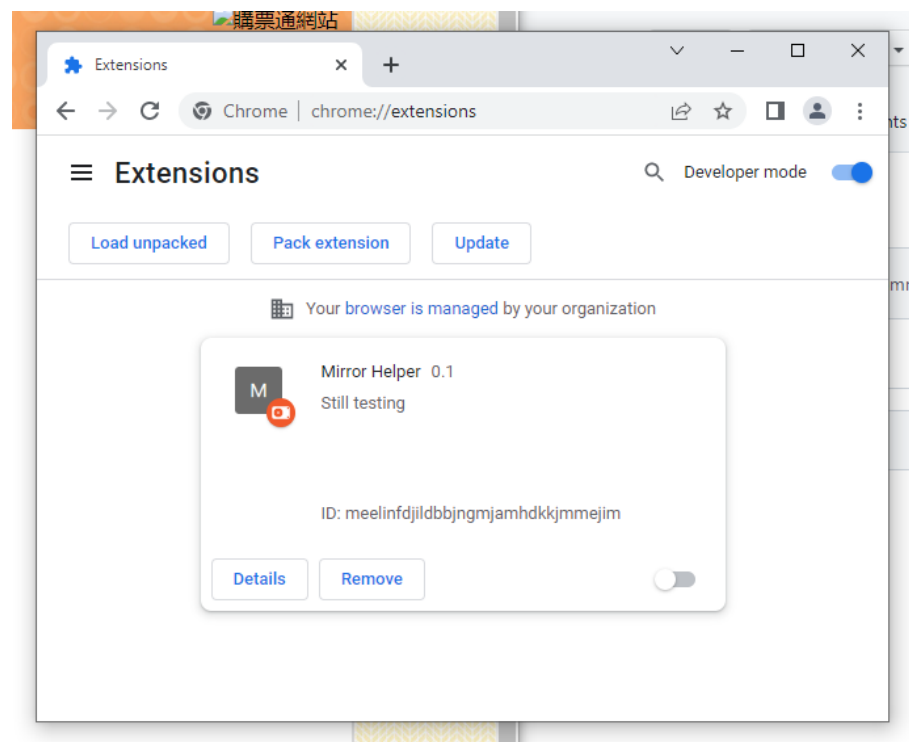

10. 見到呢頁冇計, 手動 refresh

停用 plugin

去 <chrome://extensions/>

熄左個藍色掣(變灰色)

Del plugin

去 <chrome://extensions/>

襟 Remove
